MODELLING THE CONSUMER PRICE AND PRODUCER PRICE INDICES WITH RELATED ECONOMIC VARIABLES

The relationship between CPI and PPI cannot be studied directly since macro-economic variables such as Exchange Rate, Money Supply, Treasury Bill Interest Rate, Exports and Imports, GDP, Rice Price Index that are linked with these two indicators.

Certain terms are strike throuhg throughout the amnuscript. The authors should carefully proof read the manuscript

since the test dataset contains small number of points , the cross validation methods would give bet6ter reesults.

Define these abbreviations at first mention ((LCCPI, LPPI, LIMP, LM2, LM1, LER, LRICE, and LGDP))

“Trace and Maximum-Eigen statistics revealed that the no. of possible co-integrations that can exist is one.”
Using “no.” as an abbreviation for the word “number” is generally considered informal and not appropriate for formal academic writing.
